**Collagen Filler Cream with Marine Collagen, Decorinyl & Tripeptide-29**

Congratulations on your purchase of Bellahut’s Collagen Filler Face Cream. Bellahut products are of the highest quality and similar products of this quality tend to have a cost of nearly three to four times the price. All of our creams, serums and gels are proudly made in the U.S.A. and have been since inception. We pride ourselves on return customers so satisfaction from our customers is key. Please enjoy this product and if you have any questions please contact us at the email address above. Thank you for being a Bellahut customer!

**Directions:** Apply on cleansed and toned skin either day or night. Use as often as needed.

Put a dab of cream on your finger and gently massage into the desired area. Keep in mind this cream can be used on both face and body.

(Optional) As a precursor you can use any of Bellahut’s Hyaluronic Acid Serums previous to apply this cream.

**Key Ingredients:**

**Decorinyl (Tripeptide-10)** is a synthesized tetrapeptide which mimics the sequences of decorin that bind to collagen fibrils. It has been shown to regulate fibrillogenesis and control fibril growth, improving firmness and elasticity of the skin, ensuring uniformity of fibril diameter and spacing of collagen fibrils. In effect, it replaces the non-functional decorin encountered as the skin ages, and also sustains a superior moisture profile.

**Fibrillogenesis** is an essential process in tissue formation, but must be controlled and regulated in order to avoid excessive bundle-like aggregation of collagen. The fibrillogenesis control is the role of decorin, a small leucine-rich proteoglycan, which is associated with collagen fibrils at specific binding sites in the protein core, controlling fibril dimensions, the uniformity of their diameter and their regular spacing. Aging skin contains a truncated form of decorin, which lacks binding regions with collagen fibrils, producing a negative effect on the elasticity on the skin. Decorinyl™ is a mimic peptide of these binding sequences that has been proven to regulate fibrillogenesis, control collagen fibril diameter and increase skin suppleness.

**Tripeptide-29** is pure (>99.7%) G-P-Hyp tripeptide produced synthetically, without the use of animal derived products or genetically modified organisms. With a molecular weight of 285 D it shows excellent bioavailability. In-vitro experiments have shown that this material will dramatically increase synthesis of Collagen. The benefits of Tripeptide-29 is (1) Increases collagen production (2) Reduces the appearance of wrinkles and plumps (3) Peptide Technology

**Vitamin E** Penetrates deep into skin to fight against free radicals and other contaminants that are both inside and outside your body. Reduces wrinkles caused by pollutions or UV exposure.

**Ingredients:** Deionized Water, Aloe Barbadensis Leaf Juice, Glyceryl Stearate, Persea Gratissima (Avocado) Oil, Simmondsia Chinensis (Jojoba) Seed Oil, Vitis Vinifera (Grape) Seed Oil, Glycerin, Butyrospermum Parkii (Shea Butter), Marine Collagen, Decorinyl (Tripeptide-10 Citrulline), Tripeptide-29, Caprylic/Capric Triglyceride, Squalane/Olea Europaea (Olive) Fruit Oil, Stearic Acid, Cyclopentasiloxane, Tocopherol (Vitamin E), Cetyl Alcohol, Phenoxyethanol and Caprylyl Glycol (Optiphen®).

**Cautions:** Although rare, should you experience any irritation discontinue use of this product. Bellahut’s hydrating creams hydrate so well that it is possible to overhydrate. Overhydration can cause small bumps on the skin. If this occurs, stop using this product for three days and your skin should return to normal. You may start using again at a reduced rate, we recommend every-other day, at this point.
