### 100% Hyaluronic Acid Cream with Trylagen

Congratulations on your purchase of Bellahut's 100% Hyaluronic Acid Cream. This cream is made from non-animal stabilized hyaluronic acid which is a pure plant-based form of hyaluronic acid. Products of this quality tend to have a cost of nearly three to four times more than the Bellahut Price. All of our creams and serums are proudly made in the U.S.A. and have been since inception. We pride ourselves on return customers so satisfaction from our customers is key. Please enjoy this product and if you have any questions please contact us at the email address above. Thank you for being a Bellahut customer!

**Directions:** Apply on cleansed and toned skin either day or night. Use as often as needed.

Put a dab of cream on your finger and gently massage into the desired area. Keep in mind this cream can be used on both face and body.

(Optional) As a precursor you can use any of Bellahut's Hyaluronic Acid Serums previous to apply this cream.

#### Key Ingredients:

**Hyaluronic acid** is a naturally occurring acid found in the extracellular matrix of human tissue. Topically applied, hyaluronic acid forms an air permeable layer and penetrates into the dermis thus boosting the elasticity by affecting the collagen levels and increasing hydration of the skin.

**TRYLAGEN** is a combination of active peptides and proteins that can fight the processes that affect the quantity and quality of collagen as we age. It acts on collagen via 3 main functions:

- **Collagen boosting** During aging, the synthesis of collagen gradually declines. The active ingredients in TRYLAGEN boost the synthesis of collagen types I, III and IV, helping to compensate for our decreased production as we age.
- **Collagen organization** The process of fibrillogenesis results in the formation of collagen bundles that are responsible for the strength and resiliency of the skin. TRYLAGEN controls collagen fibril dimensions by providing a uniformed arrangement to their diameter and spacing them regularly. This provides a better cohesion and stabilization of collagen fibers, and gives suppleness to the skin.
- **Collagen protection** After a certain age the degradation of collagen speeds up, due to an increase in MMP (matrix metalloproteinases) levels. Collagenases, a specific type of MMP, cleave fibrillar collagen into smaller fragments, which are then susceptible to further proteolysis. TRYLAGEN inhibits the production of human MMP-2 and MMP-3, therefore avoiding excessive collagen damage in aged skin. Its anti-collagenase activity protects collagen from degradation.

**Ingredients:** Deionized water, sodium hyauronate, potassium sorbate, citric acid.

**Cautions:** Although rare, should you experience any irritation discontinue use of this product. Bellahut's hydrating creams hydrate so well that it is possible to overhydrate. Overhydration can cause small bumps on the skin. If this occurs, stop using this product for three days and your skin should return to normal. You may start using again at a reduced rate, we recommend every-other day, at this point.
