**Triple Lifting Eye Gel with Argireline and Matrixyl 3000**

Congratulations on your purchase of Bellahut’s Triple Lifting Eye Gel. This gel is of the highest quality and contains concentrated quantities of peptides for quick and dramatic results. Similar products of this quality tend to have a cost of nearly three to four times more than the Bellahut Price. All of our creams and serums are proudly made in the U.S.A. and have been since inception. We pride ourselves on return customers so satisfaction from our customers is key. Please enjoy this product and if you have any questions please contact us at the email address above. Thank you for being a Bellahut customer!

**Directions:** Apply on cleansed and toned skin. Bellahut recommends using this product twice daily for best results.

Put a pea sized amount of gel on your finger and gently massage into the skin underneath the eye area.

**Key Ingredients:**

**Argireline** is a peptide that helps with prevention of wrinkles in the skin. When it is absorbed into the body and the cream's chemical composition causes the facial muscles to contract with less force helping with the reduction of wrinkles. This peptide can be quite effective, and in some cases with just the use of Argireline alone, users have experienced up to a 30% reduction in fine lines and wrinkles.

**Matrixyl 3000** is an amazing collagen builder and is the trademark name for palmitoyl pentapeptide-3, one of the powerful peptide molecules found in the latest generation of high-end anti-wrinkle skin care products. This breakthrough ingredient stimulates collagen production in the skin and can even give BOTOX® injections a run for their money in the anti-wrinkle department. Matrixyl becomes even more effective when combined with other peptides. The researchers reported, “A highly significant reduction in the deep and moderate wrinkles was obtained on the side treated with 3% Matrixyl. At the conclusion of the study, the surface area occupied by deep wrinkles was reduced by mean of 68%. The surface area occupied by moderate wrinkles was reduced by mean of 51%.”

- Reduction in depth of regular wrinkles up to 29%
- Increase overall Collagen synthesis by up to 117%
- Increase Collagen IV synthesis by up to 357%
- Increase Hyaluronic Acid by up to 267%
