Ultimate Eye Cream with EGF, Matrixyl 3000 and Chrysin

Congratulations on your purchase of Bellahut’s Ultimate Eye Cream. This cream is of the highest quality and contains concentrated quantities of peptides for quick and dramatic results. Similar products of this quality tend to have a cost of nearly three to four times more than the Bellahut Price. All of our creams and serums are proudly made in the U.S.A. and have been since inception. We pride ourselves on return customers so satisfaction from our customers is key. Please enjoy this product and if you have any questions please contact us at the email address above. Thank you for being a Bellahut customer!

Directions: Apply on cleansed and toned skin. Bellahut recommends using this product twice daily for best results.

Put a pea sized amount of cream on your finger and gently massage into the skin underneath the eye area.

For External Use Only.

Key Ingredients:

Chrysin Another powerful anti-aging ingredient that is similar to Hesperidin. This plant-derived flavanoid is well documented for exhibiting anti-inflammatory, anti-tumor, anti-carcinogenic and vasorelaxant capabilities that provide the vasoprotective effects as hesperidin. Some lab tests also suggest that *chrysin* inactivates the enzyme Uridine Diphosphate-glucuronosyltransferase (UGT1A1), which helps eliminate pigmented bilirubin and iron deposits underneath the skin (aka dark circles). For this reason, this ingredient is extremely popular with under eye creams looking to combat puffiness and dark circles.

Lutein The powerful antioxidant lutein has been regarded as a vital nutrient for eye health, the newer research suggests lutein’s antioxidant action has a positive impact on skin health as well. Its benefits include bolstering the skin’s natural antioxidant defenses increasing the hydration of the skin, helping to protect skin from potentially damaging effects of sun and artificial light exposure. A nutrient naturally found in dark green leafy vegetables like spinach, kale and collard greens.

Alpha Lipoic Acid An extremely potent anti-oxidant that promotes healthy cell function, boosts skin’s radiance and minimizes enlarged pores and surface imperfections. Alpha Lipoic Acid helps Vitamins C and E work more effectively in the skin. It has anti-inflammatory qualities, which can be helpful in reducing the redness associated with rosacea, acne and sensitive skin types. It reduces the appearance of wrinkles, fine lines, dull skin, puffy eyes and dark circles.

Tocotrienol is a potent form of Vitamin E (considered to be 40 – 60 times more powerful than other Vitamin E derivatives) found in vegetable wheat germ, barley, saw palmetto, and certain types of nuts and grains. It is used in skin care products because of its antioxidant properties, and is found primarily as a skin conditioning agent and UV absorber . The Vitamin E compounds in Tocotrienol protect cell membranes, active enzyme sites, and DNA from free radical damage, and therefore can prevent signs of aging including wrinkles and fine lines.

Astaxanthin Natural astaxanthin has been shown to be a potent antioxidant over 500 times stronger than vitamin E and 10 times stronger than beta-carotene. Astaxanthin has also been shown to enhance and modulate the immune system. These effects in combination or separately may reduce the acute inflammation reaction of the skin and tissue just beneath the skin that follows excessive exposure to UV radiation.

Lycopene is antioxidant and sunscreen in one, and is the best free radical scavenger and UV-light blocker among carotenes, apply lycopene products for 2-4 weeks then you will get the antioxidant, UV-protection and possibly other anti-aging benefits regardless of your skin type or complexion since it is at least two to three times as effective an antioxidant as beta carotene.

Ingredients: Deionized Water, Aloe Barbadensis Leaf Juice, Glyceryl Stearate, Persea Gratissima (Avocado) Oil, Simmondsia Chinensis (Jojoba) Seed Oil, Vitis Vinifera (Grape) Seed Oil, Glycerin, Butyrospermum Parkii (Shea Butter), Caprylic/Capric Triglyceride, Squalane/Olea Europaea (Olive) Fruit Oil, Matrixyl 3000 (palmitoyl tetrapeptide-3), EGF (epidermal grow factor), Chrysin, Stearic Acid, Cyclopentasiloxane, Tocopherol (Vitamin E), Cetyl Alcohol, Phenoxyethanol and Caprylyl Glycol (Optiphen®).

Cautions: Although rare, should you experience any irritation discontinue use of this product. Keep out of reach of children.
