Stem Cell Eye Cream with Phytocelltec, Eyeliss, Haloxyl & Caffeine

Congratulations on your purchase of Bellahut’s Stem Cell Eye Cream. This cream is of the highest quality and contains concentrated quantities of peptides for quick and dramatic results. Similar products of this quality tend to have a cost of nearly three to four times more than the Bellahut Price. All of our creams and serums are proudly made in the U.S.A. and have been since inception. We pride ourselves on return customers so satisfaction from our customers is key. Please enjoy this product and if you have any questions please contact us at the email address above. Thank you for being a Bellahut customer!

Directions: Apply on cleansed and toned skin. Bellahut recommends using this product twice daily for best results.

Put a pea sized amount of cream on your finger and gently massage into the skin underneath the eye area.

For External Use Only.

Key Ingredients:

PhytoCellTec preserves the ability to form new epidermal tissue. Young and vital epidermal stem cells can form a complete, multi-layer epidermis in laboratory conditions. When this experiment is conducted on older stem cells, these no longer multiply and no epidermis is formed. These stem cells are depleted and have reached the end of their lifecycle. If Malus Domestica stem cell extract is added to "old" cultivated stem cells, the cells can still generate a stratified epidermis. Under the influence of Malus Domestica stem cell extract, the epidermal stem cells retain their vitality longer and are capable of forming new tissue and renewing the skin.

Eyeliss contains three peptides, Hesperidin Methyl Chalcone, Dipeptide Valyl-Tryptophane and Lipopeptide Pal-GQPR. Clinical studies have shown it to be very effective in reducing under eye puffiness, dark circles and bags and in tests, 70% of users showed a vast improvement in less than 2 months.

- **Hesperidin Methyl Chalcone** is a natural ingredient derived from flavonoid hesperidin found in citrus fruits like grapefruit and oranges. This rather newly discovered ingredient helps to strengthen capillaries and veins as well to improve lymphatic drainage and circulations which tones the delicate under eye area.
- **Dipeptide Valyl-Tryptophane** is a peptide that promotes the drainage of fluid that collects under the eye creating bags and puffiness.
- **Lipopeptide Pal-GQPR** is another peptide that decreases inflammation, improves skin elasticity and firmness, and reduces fine lines and wrinkles.

Haloxyl is a synthetic ingredient made to reduce dark circles under the eyes and studies have shown an improvement between 19% and up to 45%. In some cases, in the complete reduction of dark circles has been accomplished. This product is specifically targeted to treat one of the most chronic under eye issues, dark eye circles.

Ingredients:

Deionized Water, Aloe Barbadosensis Leaf Juice, Eyeliss, Haloxyl, Phytocelltec, Caffeine, Camellia, Glyceryl Stearate, Persea Gratissima (Avocado) Oil, Simmondsia Chinensis (Jojoba) Seed Oil, Vitis Vinifera (Grape) Seed Oil, Glycerin, Butyrospermum Parkii (Shea Butter), Caprylic/Capric Triglyceride, Squalane/Olea Europaea (Olive) Fruit Oil, Stearic Acid, Cyclopentasiloxane, Tocopherol (Vitamin E), Cetyl Alcohol, Phenoxyethanol and Caprylyl Glycol (Optiphen®).
