Directions: Apply on cleansed and toned skin either day or night. Use as often as needed.

Put a dab of cream on your finger and gently massage into the desired area. Keep in mind this cream can be used on both face and body.

Key Ingredients:

Alpha-Arbutin is a powerful, yet gentle, lightening agent derived from the Bearberry tree. Alpha-Arbutin brings all the benefits of strong melanin inhibitors like hydroquinone without the strong odor, toxicity, and potential side effects. Alpha-Arbutin is quickly becoming the logical alternative to harsh skin lightening chemicals.

L-Ascorbic Acid (Vitamin C) is most commonly known as Vitamin C, a powerful antioxidant that helps to neutralize cell damage of free radicals. It used to fade away dark spots, sun damage and age spots. It is a water-soluble solution that is essential for growth and repair for many parts of the body. Ascorbic acid is an important component for the synthesis of collagen and it also is essential in wound healing and the maintenance of cartilage.

Keratoline Is an enzyme that is highly compatible with the skin also a gentle bio-exfoliator, with efficacy comparable with that of AHA (Alpha Hydroxy Acid)

Ascorbic acid 2-glucoside (AA2G) Inhibits pigment growth and lightens dark spots while brightening your complexion.
