**Bellahut's Eyeliss Peptide**  
**Helps Reduce Eye Bags And Puffiness Under The Eyes**

Congratulations on your purchase of Bellahut's Eyeliss Peptide. We pride ourselves on return customers so satisfaction from our customers is key and very important to us.

Please enjoy this product and if you have any questions please contact us at the email address above. Thank you for being a Bellahut customer!

**Directions:** Mix this peptide with a cream, gel or serum in order to make your own custom skin care solution. Keep in mind you should only mix this peptide at a **maximum rate of 5%**.

**Key Ingredients:**

Eyeliss is formulated based upon advanced peptide technology which clinical studies demonstrate works effectively to reduce under eye bags and puffiness by 70%, and is a combination of four active peptides.

- Hesperidin Methyl Chalcone ( bioflavonoid ) is a natural ingredient derived from flavonoid hesperidin found in citrus fruits like grapefruit and oranges. This rather newly discovered ingredient helps to strengthen capillaries and veins as well to improve lymphatic drainage and circulations which tones the delicate under eye area.
- Dipeptide Valyl-Tryptophane ( aka Syn®-Ake ) is a peptide that promotes the drainage of fluid that collects under the eye creating bags and puffiness.
- Lipopeptide Pal-GQPR ( Matrixyl 30000 ) is another peptide that decreases inflammation, improves skin elasticity and firmness, and reduces fine lines and wrinkles.
- Tripeptide-5 ( aka Syn®-Coll ) is highly bioactive, deeply skin penetrating peptide (palmitoyl tripeptide-5) able to activate tissue growth factor (TGF-beta) that stimulates collagen synthesis in the skin.

**Ingredients:**  
 Eyeliss Peptide

**INCI:** Water (and) Glycerin (and) Hesperidin Methyl Chalcone, Dipeptide Valyl-Tryptophane, Lipopeptide Pal-GQPR

**Cautions:** Do not apply undiluted peptides or additives directly onto your skin. This is designed to be added to a formulation at the recommended maximum usage rate or less.

You can use Bellahut's premium cream or gel as your base for your formulation.
