Thank you for being a Bellahut customer!

Key Ingredients:

Snap-8 is a peptide that limits the ability of the face to squint and grin by reducing muscle movement. When the skin is relaxed, expression lines are reduced. Snap-8 is focused on the reduction of wrinkles, reducing expression lines and reducing crow's feet. It, like Argireline, is an excellent ingredient found in today's most popular anti-aging serums, creams and gels.

Matrixyl 3000 is an amazing collagen builder and is the trademark name for palmitoyl pentapeptide-3, one of the powerful peptide molecules found in the latest generation of high-end anti-wrinkle skin care products. This breakthrough ingredient stimulates collagen production in the skin and can even give BOTOX® injections a run for their money in the anti-wrinkle department. Matrixyl becomes even more effective when combined with other peptides. The researchers reported, "A highly significant reduction in the deep and moderate wrinkles was obtained on the side treated with 3% Matrixyl. At the conclusion of the study, the surface area occupied by deep wrinkles was reduced by mean of 68%. The surface area occupied by moderate wrinkles was reduced by mean of 51%."

- Reduction in depth of regular wrinkles up to 29%
- Increase overall Collagen synthesis by up to 117%
- Increase Collagen IV synthesis by up to 357%
- Increase Hyaluronic Acid by up to 267%
