Stem Cell Eye Contour Serum

Congratulations on your purchase of Bellahut's Stem Cell Eye Contour Serum. All of our creams, serums and gels are proudly made in the U.S.A. and have been since inception. We pride ourselves on return customers so satisfaction from our customers is key. Please enjoy this product and if you have any questions please contact us at the email address above. Thank you for being a Bellahut customer!

Directions: Apply a few drops of serum to your finger. Gently massage into the skin underneath your eyes until the serum is evenly distributed and absorbed.

 (Optional) Cover with a moisturizer or cream of your choice.

Key Ingredients:

Eyeliss contains three peptides, Hesperidin Methyl Chalcone, Dipeptide Valyl-Tryptophane and Lipopeptide Pal-GQPR. Clinical studies have shown it to be very effective in reducing undereye puffiness, dark circles and bags and in tests, 70% of users showed a vast improvement in less than 2 months.

- **Hesperidin Methyl Chalcone** is a natural ingredient derived from flavonoid hesperidin found in citrus fruits like grapefruit and oranges. This rather newly discovered ingredient helps to strengthen capillaries and veins as well to improve lymphatic drainage and circulations which tones the delicate under eye area.
- **Dipeptide Valyl-Tryptophane** is a peptide that promotes the drainage of fluid that collects under the eye creating bags and puffiness.
- **Lipopeptide Pal-GQPR** is another peptide that decreases inflammation, improves skin elasticity and firmness, and reduces fine lines and wrinkles.

Haloxyl is a synthetic ingredient made to reduce dark circles under the eyes and studies have shown an improvement between 19% and up to 45%. In some cases, in the complete reduction of dark circles has been accomplished. This product is specifically targeted to treat one of the most chronic under eye issues, dark eye circles.

PhytoCellTec preserves the ability to form new epidermal tissue. Young and vital epidermal stem cells can form a complete, multi-layer epidermis in laboratory conditions. When this experiment is conducted on older stem cells, these no longer multiply and no epidermis is formed. These stem cells are depleted and have reached the end of their lifecycle. If Malus Domestica stem cell extract is added to "old" cultivated stem cells, the cells can still generate a stratified epidermis. Under the influence of Malus Domestica stem cell extract, the epidermal stem cells retain their vitality longer and are capable of forming new tissue and renewing the skin.

Ingredients:

Water/Aqua/Eau, hyaluronic acid, Marine Collagen, PhytoCellTec® (Swiss Apple Fruit Culture Extract), Eyeliss®, Haloxyl® Propanediol, Hydrogenated Castor Oil, Trideceth-9, Triethanolmine, Carbomer, Rosa Centifolia Leaf Cell Extract, Rosa Alba Leaf Cell Extract, Rosa Damascena Leaf Cell Extract, Rosa Canina Fruit Extract, Rosa Damascena Flower Oil, Rosa Canina Fruit Oil, Rose Centifolia Flower Water, Commiphora Myrrha Leaf Cell Extract, Adenium Obesum Leaf Cell Extract, Leuconostoc/Radish Root Ferment Filtrate, Glycerin, Allantoin, Aloe Barbadensis Leaf Juice, Sodium PCA, Propylene Glycol, Ethylhexylglycerin, PEG-40, Ethylhexyl Salicylate, Ethylhexyl Methoxycinnamate, Disodium EDTA, Potassium Sorbate
