Stem Cell Eye Bright Serum

Congratulations on your purchase of Bellahut's Stem Cell Eye Bright Serum. All of our creams, serums and gels are proudly made in the U.S.A. and have been since inception. We pride ourselves on return customers so satisfaction from our customers is key. Please enjoy this product and if you have any questions please contact us at the email address above. Thank you for being a Bellahut customer!

Directions: Apply a few drops of serum to your finger. Gently massage into the skin until the serum is evenly distributed and absorbed.

(Optional) Cover with a moisturizer or cream of your choice.

Key Ingredients:

Chrysin is a flavanoid, derived from plants, that is well document for having anti-inflammatory and anti-carcinogenic capabilities. This flavanoid is also known for reducing the appearance of skin discoloration as well as being an antioxidant.

PhytoCellTec (Apple Stem Cells) preserves the ability to form new epidermal tissue. Young and vital epidermal stem cells can form a complete, multi-layer epidermis in laboratory conditions. When this experiment is conducted on older stem cells, these no longer multiply and no epidermis is formed. These stem cells are depleted and have reached the end of their lifecycle. If Malus Domestica stem cell extract is added to "old" cultivated stem cells, the cells can still generate a stratified epidermis. Under the influence of Malus Domestica stem cell extract, the epidermal stem cells retain their vitality longer and are capable of forming new tissue and renewing the skin.

Matrixyl (aka Palmitoyl-Pentapeptide-3) is the trade name for a pentapeptide produced by a French supplier to the cosmetics industry. Proven in clinical studies to improve wrinkle appearance more rapidly than Retinol. The use of Matrixyl has been shown to reduce the appearance of fine lines, wrinkles, age spots. Matrixyl is one of the most effective raw materials available to the cosmetic scientist for anti-aging products.
