 Helps Grow Thicker And Longer Eyelashes**

Congratulations on your purchase of Bellahut’s Eyelash Growth Complex. We pride ourselves on return customers so satisfaction from our customers is key and very important to us.

Please enjoy this product and if you have any questions please contact us at the email address above. Thank you for being a Bellahut customer!

Directions: Mix this peptide with a cream, gel or serum in order to make your own custom skin care solution. Keep in mind you should only mix this peptide at a **maximum rate of 10%**.

(MAXIMUM IS 5% WHEN COMBINED WITH HEXAPEPTIDE-16)

Key Ingredients:

This peptide, in in-vivo studies, has shown an increase in appearance of fullness and thickness up to 25% in just a two-week period of time and a 66% increase in just 28 days of use.

- Significantly improves the look of eyelashes making them appear longer, thicker, and fortified
- Noticeably intensifies eye expression
- Can be combined with myristoyl hexapeptide-16 for best results
- Visible effect in 2-4 weeks. Best results at 6 weeks. Hair on the eyelashes and eyebrows have a very short active growth phase of only about 30-45 days which explains why they are shorter than scalp hair. Approximately 60-80% of the eyelashes are in this phase. Entire duration of cycle for the eyelashes is 3-4 months whereas the scalp hair cycle is about 3-6 years.

Ingredients:

Eyelash Growth Complex

INCI: Water, glycerin, myristoyl pentapeptide-17

Cautions: Do not apply undiluted peptides or additives directly onto your skin. This is designed to be added to a formulation at the recommended maximum usage rate or less.

You can use Bellahut's premium cream or gel as your base for your formulation.
