**Bellahut's Haloxyl Peptide**  
**Helps With The Reduction Of Dark Circles Under The Eyes**

Congratulations on your purchase of Bellahut's Haloxyl Peptide. We pride ourselves on return customers so satisfaction from our customers is key and very important to us.

Please enjoy this product and if you have any questions please contact us at the email address above. Thank you for being a Bellahut customer!

**Directions:** Mix this peptide with a cream, gel or serum in order to make your own custom skin care solution. Keep in mind you should only mix this peptide at a **maximum rate of 3%**.

Haloxyl lessens under eye dark circles and reinforces firmness and tone of the eye area. In a study with 22 female volunteers the application of a gel containing 2% Haloxyl for 56 days resulted in an improvement of dark circles in more than 70% as assessed by image analysis and computerized measurement of color parameters.

Haloxyl is a combination of active ingredients able to absorb and eliminate colored blood pigments in the skin that are responsible for dark circles under the eyes. It also has an anti-inflammatory effect and reinforces firmness and tone of the eye area.

Haloxyl is a synthetic ingredient made to reduce dark circles under the eyes and studies have shown an improvement between 19% and up to 45%. In some cases, in the complete reduction of dark circles has been accomplished. This product is specifically targeted to treat one of the most chronic under eye issues, dark eye circles.

During extensive experiments of the most effective treatments of this specific indication, scientist found that the association of two matrikines: Pal-GHK and Pal-GQPR with N-hydroxysuccinimide (NHS) and a flavinoid: Chrysin was the most effective combination to eliminate dark circles and inflammation. During testing large percentages of volunteers displayed reduction in all b-, b+, a-, and a+ color ranges. Pal-GHK and Pal-GQPR reinforce firmness and tone of the eye area. Chrysin and N-hydroxysuccinimide activate the elimination of blood originated pigments responsible for dark circle color and local inflammation.

**INCI:** water, glycerin, steareth-20, N-hydroxysuccinimide, chrysin, palmitoyl Oligopeptide, palmitoyl tetrapeptide-7, Chlorhexidine Digluconate (20% in water): 1%, Potassium Sorbate: 0.1%.

**Cautions:** Do not apply undiluted peptides or additives directly onto your skin. This is designed to be added to a formulation at the recommended maximum usage rate or less.

You can use Bellahut's premium cream or gel as your base for your formulation.
