Bellahut's Leuphasyl Peptide

Focuses On The Reduction Of Expression Wrinkles & Lines

Congratulations on your purchase of Bellahut's Leuphasyl Peptide. We pride ourselves on return customers so satisfaction from our customers is key and very important to us.

Please enjoy this product and if you have any questions, please contact us at the email address above. Thank you for being a Bellahut customer!

Directions: Mix this peptide with a cream, gel or serum in order to make your own custom skin care solution. Keep in mind you should only mix this peptide at a **maximum rate of 10%**.

Key Ingredients:

With the ability to reduce the depth of expression wrinkles up to 24.6% this key ingredient is a must have in any anti-aging cream. Add this to Bellahut's premium cream and combine with any number of our other premium peptides and make an extremely high-quality cream that is tailored exactly for your needs.

Leuphasyl reduces the depth of wrinkles on the face caused by the contraction of muscles of facial expression, especially in the forehead and around the eyes. It targets the wrinkle-formation mechanism of expression wrinkles in a new way, offering an alternative to peptides like Argireline.

Leuphasyl is a peptide to reduce expression wrinkles that offers two main advantages:

- A new and alternative in vitro mechanism to fight expression wrinkles.
- An additive / synergistic effect to complement the action of Argireline and other peptides.

Leuphasyl's mechanism mimics in vitro the natural mechanism of enkephalins: it couples to the enkephalin receptor, on the outside of the nerve cells. When Leuphasyl couples to the receptor, a conformational change initiates a cascade inside the neuron that results in a decrease of its excitability: the nerve cell's activity is "turned down" and the release of acetylcholine is modulated. Muscle contraction will be relaxed and therefore, expression wrinkles can be diminished.

Ingredients:

Leuphasyl Peptide

INCI: Water [Aqua] (and) Glycerin and Pentapeptide-18

Cautions: Do not apply undiluted peptides or additives directly onto your skin.

This is designed to be added to a formulation at the recommended maximum usage rate or less.

You can use Bellahut's premium cream or gel as your base for your formulation.
