Helps Reduce Wrinkles, Repair & Regenerate Damaged Skin + Increase Collagen Production

Congratulations on your purchase of Bellahut’s Phytocelltec Blueberry Stem Cell Peptide. We pride ourselves on return customers so satisfaction from our customers is key and very important to us.

Please enjoy this product and if you have any questions please contact us at the email address above. Thank you for being a Bellahut customer!

Directions: Mix this peptide with a cream, gel or serum in order to make your own custom skin care solution. Keep in mind you should only mix this peptide at a **maximum rate of 5%**.

Some of the key benefits of PhytoCellTec-Biotics Blueberry are it is rich in essential fatty acids and Phytonutrients, it has excellent Anti-Aging fighting properties, it incorporates stem cell technology, is a powerful antioxidant and has radical Scavenging Properties. Mixed with Bellahut's premium cream base or gel base and any combination of our other high-quality peptides you have a skin care solution that is tailored specifically for your needs.

The demand for stem cell technologies has grown exponentially in the last decade. Trending specifically in the cosmetic market, current stem cell technologies utilize Meristematic cells, non-differentiating plant stem cells from simple cell extracts with no specific activity. To propel beyond the current offerings on the market, it was chosen to use biotic stress, embodied by the sustainable practice of co-culturing of plant stem cells with *Leuconostoc sp.* to promote the formation of secondary metabolites. This novel approach induces cellular differentiation and provides formulators with the ability to finely customize formulations, specify activity and skin benefits while offering brand distinction. **Phyto-Biotics Blueberry** capitalizes on specific activity of the phenolic metabolites produced by blueberries to provide the cosmetic market with a plant-derived, stem cell ingredient designed to impart antioxidant, protectant and anti-aging benefits while enhancing cellular metabolism.

Benefits of Phyto-Biotics Blueberry

- Rich in Essential Fatty Acids and Phytonutrients
- Anti-Aging
- Stem Cell Technology
- Antioxidant
- Radical Scavenging Properties

INCI: Malus Domestica (standard version): Malus Domestica Fruit Cell Culture Extract (and) Xanthan Gum (and) Glycerin (and) Lecithin (and) Phenoxyethanol (and) Aqua / Water

Cautions: Do not apply undiluted peptides or additives directly onto your skin. This is designed to be added to a formulation at the recommended maximum usage rate or less.

You can use Bellahut's premium cream or gel as your base for your formulation.
