**Bellahut's Lip Collagen (Tripeptide-29) Peptide
Collagen Booster For Types I & IV / Expression Wrinkle Reducer**

Congratulations on your purchase of Bellahut's Lip Collagen Peptide. We pride ourselves on return customers so satisfaction from our customers is key and very important to us.

Please enjoy this product and if you have any questions please contact us at the email address above. Thank you for being a Bellahut customer!

Directions: Mix this peptide with a cream, gel or serum in order to make your own custom skin care solution. Keep in mind you should only mix this peptide at a **maximum rate of 15%**.

Key Ingredients:

Tripeptide 29 is a three-chain amino acid shown to increase fibroblast activity for collagen I synthesis by 400 percent. This increase in support within the skin minimizes the look of fine lines and wrinkles. Many researchers over the years have determined that breaking down collagen with either alkaline, or enzymatic hydrolysis produces a product that can increase the collagen production of cultured cells three-fold. The theory behind Tripeptide-29 is the following: Collagen is a long sequence of amino acids and breaking it down produces short amino acid sequences, aka peptides. These peptides "signal" to the skin that collagen was lost and that new collagen should be produced.

INCI: Tripeptide-29

Cautions: Do not apply undiluted peptides or additives directly onto your skin. This is designed to be added to a formulation at the recommended maximum usage rate or less.

You can use Bellahut's premium cream or gel as your base for your formulation.
