**Bellahut’s Biodynes EMPP Peptide  
 Helps Increase Collagen and Elastin Production**

Congratulations on your purchase of Bellahut’s Biodynes EMPP Peptide. We pride ourselves on return customers so satisfaction from our customers is key and very important to us.

Please enjoy this product and if you have any questions please contact us at the email address above. Thank you for being a Bellahut customer!

**Directions:** Mix this peptide with a cream, gel or serum in order to make your own custom skin care solution. Keep in mind you should only mix this peptide at a **maximum rate of 1%**.

**Key Ingredients:**

**Biodynes EMPP** Naturally Derived Active Biodynes EMPP Promotes collagen and elastin production in the skin. The extracellular matrix of human skin is comprised of collagen, elastic fibers (of which elastin is a major component), and the basement membrane associated macromolecules such as proteoglycans, fibronectin and laminin. As skin ages both intrinsically and through photo-aging, the aging process is manifested on the skin as the visible signs of aging - including sagging skin, wrinkles, and loss of skin elasticity.

**Ingredients:**

SNAP-8 Peptide

**INCI:** Water & saccharomycesm Ferment Lysate Filtrate.

**Cautions:** Do not apply undiluted peptides or additives directly onto your skin. This is designed to be added to a formulation at the recommended maximum usage rate or less.

You can use Bellahut's premium cream or gel as your base for your formulation.
