**Bellahut’s Phytocelltec – Acai Stem Cell Peptide**

**Focused On Boosting Collagen, Speeding Cellular Metabolism & Decreasing Wrinkles**

Congratulations on your purchase of Bellahut’s Trylagen Peptide. We pride ourselves on return customers so satisfaction from our customers is key and very important to us.

Please enjoy this product and if you have any questions please contact us at the email address above. Thank you for being a Bellahut customer!

The demand for stem cell technologies has grown exponentially in the last decade in the cosmetic market. Current stem cell technologies utilize Meristematic cells, non-differentiating plant stem cells from simple cell extracts with no specific activity. To propel beyond the current offerings on the market, it was chosen to use biotic stress (embodied by the sustainable practice of co-culturing of plant stem cells with Leuconostoc sp.) to promote the formation of secondary metabolites. This approach induces cellular differentiation and provides formulators with the ability to finely customize formulations, specify activity and skin benefits.

**INCI:** Euterpe Oleracea Fruit Extract

**Directions:** Mix this peptide with a cream, gel or serum in order to make your own custom skin care solution. Keep in mind you should only mix this peptide at a **maximum rate of 10%**.

**Cautions:** Do not apply undiluted peptides or additives directly onto your skin. This is designed to be added to a formulation at the recommended maximum usage rate or less.

You can use Bellahut's premium cream or gel as your base for your formulation.
