Bellahut's Age Defense Complex

A Combination of Argireline, Snap-8 & SYN-AKE. Reduce Wrinkles, Relaxes Muscles & Reduces Movement That Increase The Signs Of Aging.

Congratulations on your purchase of Bellahut's Age Defense Complex. We pride ourselves on return customers so satisfaction from our customers is key and very important to us.

Please enjoy this product and if you have any questions please contact us at the email address above. Thank you for being a Bellahut customer!

Directions: Mix this peptide with a cream, gel or serum in order to make your own custom skin care solution. Keep in mind you should only mix this peptide at a **maximum rate of 8%**.

Argireline is a peptide that helps with prevention of wrinkles in the skin. When it is absorbed into the body and the cream's chemical composition causes the facial muscles to contract with less force helping with the reduction of wrinkles. This peptide can be quite effective, and in some cases with just the use of Argireline alone, users have experienced up to a 30% reduction in fine lines and wrinkles.

Snap-8 is a peptide that limits the ability of the face to squint and grin by reducing muscle movement. When the skin is relaxed, expression lines are reduced. Snap-8 is focused on the reduction of wrinkles, reducing expression lines and reducing crow's feet. It, like Argireline, is an excellent ingredient found in today's most popular anti-aging serums, creams and gels.

SYN-AKE is a small molecular weight synthetic peptide that smoothens expression lines by topical application. It mimics the activity of Waglerin-1, a natural occurring peptide found in temple viper venom which has a strong ability to relax muscle contraction.

Ingredients:
Water (and) Glycerin (and) Argireline (and) Syn-Ake (and) Snap-8

Cautions: Do not apply undiluted peptides or additives directly onto your skin. This is designed to be added to a formulation at the recommended maximum usage rate or less.

You can use Bellahut's premium cream or gel as your base for your formulation.
